

6516209950.txt

I am a subscriber to XM Radio. I have opted to pay for a service that actually programs music, entertainment and information that I like, want and need. Terrestrial radio has long been a cultural wasteland where they play the same 40 tunes over and over, program the same shows over and over, and allow sales pitches to be screamed at me every 3 minutes. In short terrestrial radio is blindly devoted to a homogenized format of the blandly banal, totally uncreative and completely irrelevant to most listeners.

Fair competition is what capitalism is all about. Your job at the FCC is to ensure that that happens. IF people don't like what you sell then you either change or fold. In it's pursuit of the bottom line terrestrial radio has refused to change so it should fold. Please reject NAB's petition 04-160.

Thank you.
